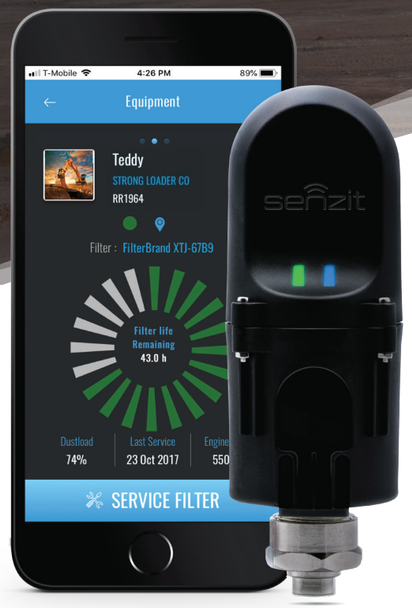
senzit

Operate Intelligently



# What is Senzit?

*What if you could know your dozer's air filter is 80% full and has 58 working hours left? Or see the exact engine hours and location of your entire fleet across every site. Now you can.*

*Introducing Senzit, the industry's first predictive maintenance platform for heavy-duty fleets. With Senzit's user-friendly mobile app and web portal, you can remotely monitor the health and location of your equipment - enabling you to optimize maintenance, reduce costs, and keep your fleet running smoothly.*

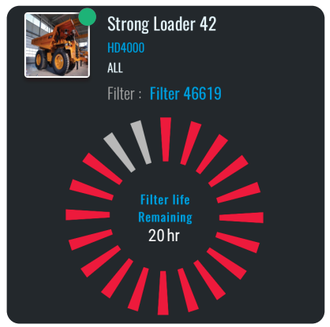
## Increase Uptime. Save Thousands.

*Optimize maintenance with remaining filter life prediction and current engine hours.*

*Reduce engine failure and costly repairs with custom alerts and notifications.*

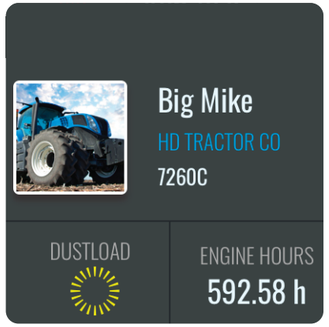
*Prevent theft and increase profitability with real-time GPS and operating hours.*

*Easy to install and works with any filter on any machine. More resources available at senzit.io.*



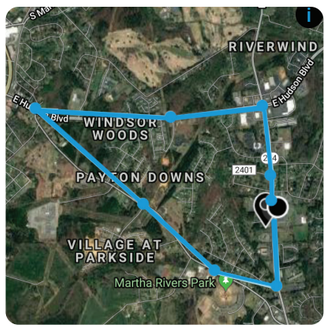
## Filter Life

*Remaining filter life prediction with percentage of filter capacity and hours.*



## Engine Hours

*Track exact engine hours of equipment and predict upcoming maintenance.*



## GPS

*Real-time location services, driving directions, and equipment trip history.*

## We believe in more uptime for your fleets.

*"Senzit is helping build our maintenance program. We are getting control of a lot of things and this system is critical to that."*
